

The Eyota 450 positive input ventilation system ensures optimal air quality in **homes up to 350 m²**. It **filters the incoming air**, removing **humidity, CO₂**, and **VOCs** while ensuring **thermal comfort** and **energy savings**. Its high-efficiency heat exchanger **recovers up to 93% of the heat from the extracted air** to warm the incoming air.

STRENGTHS

- > **Smart control and connectivity** with humidity and CO₂ sensors, remote control, and VA CONNECT mobile app.
- > **Energy savings:** heat recovery efficiency up to 93% and 100% modular bypass, active year-round
- > **Installation flexibility:** vertical or horizontal branch connections and left/right reversibility
