

The VA CONNECT mobile app allows for the **configuration, control, and maintenance** of Eyota 300, 450, and 600 ventilation systems with heat recovery.

STRENGTHS

- > **For professionals**, the app ensures quick **and complete** commissioning with its step-by-step guide and detailed installation report. With automatic software updates, Eyota ensures your device is always up-to-date, taking advantage of the latest features
- > **For individuals**, intuitive visual indicators offer **an easy way to monitor air quality** and **adjust their system** to meet their needs, ensuring optimal comfort and efficiency

DESCRIPTION

For professionals, the VA CONNECT app allows access to the following functions:

- > Pairing with the ventilator via Bluetooth
- > Complete installation assistant. The app guides you through several steps with a checklist for an organised installation:
 - Choice of unit orientation
 - Setting of modes and speeds for extraction and supply
 - Adjustment of air quality targets (humidity and CO₂)
 - Sensor management
 - Configuration of comfort settings: bypass programming, setpoint temperatures
 - Functional tests and performance
 - Commissioning report
- > Import of a configuration file and duplication of settings
- > Locking parameters
- > Access to operating history
- > Automatic update of the embedded software
- > Reset of the filter counter

For individuals, the VA CONNECT app provides access to the following features:

- > Overview of indoor air quality: indoor and outdoor temperatures, humidity levels, and CO₂ concentration
- > Quick mode adjustment based on needs
- > Scheduling, quiet hours, and vacation mode
- > Maintenance log

TECHNICAL DATA

- > Compatible with mobile phones and tablets
 - Android 13 and later versions
 - iOS 16 and later versions
 - Bluetooth version 4.2 or later versions
